Allowable Subject Matter

Claims 1-2 and 4-17 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose every limitation of Claim 1-2 and 4-17. More specifically, the prior art fails to disclose or suggest a method for monitoring a grid management system, the method comprising:

- receiving a request that visualizes a grid network with a first node representing a first grid manager from a set of linked nodes,
 - the linked nodes representing computers running grid managers and vectors representing relations between pairs of grid managers;
- displaying the first node representing the first grid manager;
- sending a first query to the first grid manager that requests an inferior grid manager
list of inferior grid managers that has an inferior relation to the first grid manager;
- receiving a first response from the first grid manager to the first query, the first response including the inferior grid manager list;

Art Unit: 2176

- displaying nodes corresponding to the grid managers in the inferior grid manager list and drawing a first group of vectors directed from the first grid manager to the inferior grid managers,
 - the first group of vectors indicating that resource requests in the grid network are routed from the first grid manager to request computational resources from the inferior grid managers
- sending a second query to the first grid manager that requests a superior grid manager list of superior grid managers having a superior relation to the first grid manager;
- receiving a second response from the first grid manager to the second query, the
- second response including the superior grid manager list; and
- displaying nodes corresponding to the grid managers in the superior grid manager list and drawing a second group of vectors directed from the superior grid managers to the first grid manager,
 - the second group of vectors indicating that the resource requests in the grid network are routed from the superior grid managers to request computational resources from the first grid manager before being routed to the inferior grid managers by the first grid manager.

Art Unit: 2176

The examiner notes that these features of the present invention are illustrated in Figure 3-7 of the Drawings and discussed in detail from Page 5, Line 28 through Page 15, Line 30 in the Specification of the present application.

Regarding Claims 15 and 16, the examiner interprets the recited “*computer*” to include the following hardware components:

- memory
- and a processor

as indicated in Page 14, Lines 15 to 25. Accordingly, Claims 15 and 16 recite statutory subject matter, as defined in 35 U.S.C. 101.

Regarding Claims 1, 4, and 17, the examiner interprets the recited “*computer readable storage device*” to be a hardware component, since the “*computer readable storage device*” includes software components in a hard drive or CD-ROM as described in detail from Page 15, Lines 1 to 13. Accordingly, Claims 1, 4, and 17 recite statutory subject matter, as defined in 35 U.S.C. 101.

Claim 2:

These claims incorporate the allowable subject matter of Claim 1 and are thus allowable.

Claims 6-14:

These claims incorporate the allowable subject matter of Claim 5 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soumya Dasgupta whose telephone number is 571-272-7432. The examiner can normally be reached on M-Th 9am-7pm, F 9am-1pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doug Hutton can be reached on 571-272-4137. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
